Professional Summary

Electronics and Communication Engineering undergraduate with a strong foundation in Embedded Systems, Digital Electronics, and IoT. Hands-on experience developing projects using ESP32, Arduino, Verilog HDL, and Tinkercad. Skilled in Embedded C/C++, problem-solving, debugging, and building practical hardware-software solutions.

Technical Skills

Languages: Embedded C, C++, Java, Verilog HDL

Embedded Systems: ESP32, Arduino, Microcontrollers, Digital Electronics, IoT

Protocols: Wi-Fi, BLE, MQTT

Tools: Arduino IDE, Tinkercad, Git, VS Code, Linux

Soft Skills: Problem Solving, Analytical Thinking, Teamwork, Communication

Education

Class 10th and 12th —Dr. Virendra Swarup Education Centre, Avadhpuri, Kanpur.

Bachelor of Technology (B.Tech) – Electronics and Communication Engineering

VIT Bhopal University

Projects

Home Automation using Arduino

- Designed and simulated a home automation system using Arduino, sensors, and actuators in Tinkercad.
- Implemented embedded control logic for automated device operation.

Robotic Arm

- Developed a real time robotic arm that in first mode sees your hand gesture and performs the same action.
- In second mode it ,when the switch dial is rotated then works the specified task.

4×4×4 LED Cube

- Built a 4×4×4 LED Cube using Arduino and Embedded C.
- Implemented LED pattern control using multiplexing techniques.

Remote controlled water pollution monitoring boat

- Designed a multi-stage embedded system machine for water pollution monitoring and water body waste collection.
- Proposed sensor-based control for efficient environmental monitoring.
